WHAT OUR CUSTOMERS SAY

"Please can you express my gratitude to Wayne. He is like a walking encyclopaedia when it comes to health and safety and I really appreciate all of this advice in order to keep our school safe for the children."

The Aspire Learning Federation

"The experience and knowledge of Sportsafe was a major reason for our picking them as a partner on this project. That same experience and knowledge was reflected all the way through the contract and we were very happy with both the result and the working practices. As can be seen, the transformation is fantastic."

Wakefield Council

"Everything we had talked about was delivered, from the equipment being high quality to the installation teams being on time, courteous and professional. And most of all – that the kids would love it. We have had to timetable usage as it has proved so popular! We will definitely be coming back to Sportsafe when we want to increase our equipment because they had such great advice and value for money."

**Kingshurst Primary School,
Birmingham**

"I just wanted to say a massive thank you once again for accommodating us with the re-attendance of an engineer. Aaron was very helpful, providing advice and support – something I greatly appreciated, especially as I am new to the role. Therefore, could I kindly request that while I am the Site Manager at Boston High School and where Aaron's availability allows, he be our preferred engineer to attend moving forward? He is a credit to the company and a thoroughly decent chap."

Boston High School

"I wanted to relay how happy myself and the school is with our inspection from Wayne. He has been doing our inspections for some time now. His level of experience and his advice over the years is commendable. He really takes pride in his job and treats my school like his own. A massive credit to Sportsafe and a really nice guy to have around the school."

Livingstone Primary School

"Can I please comment on the excellent service we received from your Engineer, Wayne Fowler, when he visited our site this morning. He was extremely professional, courteous and thorough, and happy to discuss in detail the recommendations he would be making and explaining the reasons for these. This was much appreciated. Thank you."
