

ABOUT LPEV

Switch to electric with confidence with LPEV, your strategic partner. With over a decade of expertise, we specialize in EV strategy and delivery, covering the entire lifecycle of your charging infrastructure. As the trusted choice for industry leaders, our tailored solutions prepare your organization for a greener future.

LPEV is dedicated to simplifying the electrification process for businesses of all sizes. Our approach ensures compliance with the latest industry regulations while optimizing energy efficiency and reducing operational costs. From planning to installation and ongoing management, we provide a seamless EV transition experience.

WHAT WE CAN DO FOR YOU

As the shift to electric vehicles accelerates, managing costs and staying compliant with evolving regulations is critical. At LPEV, we simplify your transition to electric, ensuring you hit your net zero targets without compromising on operational efficiency or performance.

From EV consultancy, delivery, and charge point management to innovative energy solutions, we've delivered it all. Consider LPEV your strategic partner guiding you through each step towards electrification so your organization is ready for the future.

HOW WE DO IT

At LPEV, we simplify your shift to electric vehicles. Our expertise guides a tailored journey that grows with your business, ensuring a sustainable, efficient future.

SPECIALIST CONSULTATIVE PLANNING

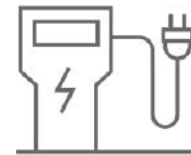

Let LPEV's specialist consultants guide your organization through planning, implementing, and optimizing your EV charging programs. Our consultation ensures adherence to regulatory compliance and maximizes your return on investment.

EV Solutions Built for Now and the Future

We'll assess your current setup, create a flexible plan, and future-proof your EV charging programme to make sure it's efficient, scalable, and compliant.

PHASED APPROACH TO EV SOLUTIONS

Phase One

POWER ASSESSMENT

Using our extensive expertise, we provide custom solutions to power your charging infrastructure in the most efficient and affordable way possible.

Phase Four

CONTINUOUS IMPROVEMENT

We provide ongoing support, management, and optimization to ensure your infrastructure performs reliably and continues to evolve as your needs grow.

Phase Two

INNOVATIVE STRATEGY IMPLEMENTATION

Our energy management specialists develop a bespoke charging program to meet your business and customer needs, integrating energy-efficient solutions like solar PV, battery storage, and energy management systems.

Phase Three

SOLUTION DELIVERY

Your bespoke EV solution is seamlessly delivered with minimal disruption, ensuring it is well-aligned and fully integrated with your business operations.

SEAMLESS INSTALLATION, UNRIVALLED PERFORMANCE

End-to-End Installation

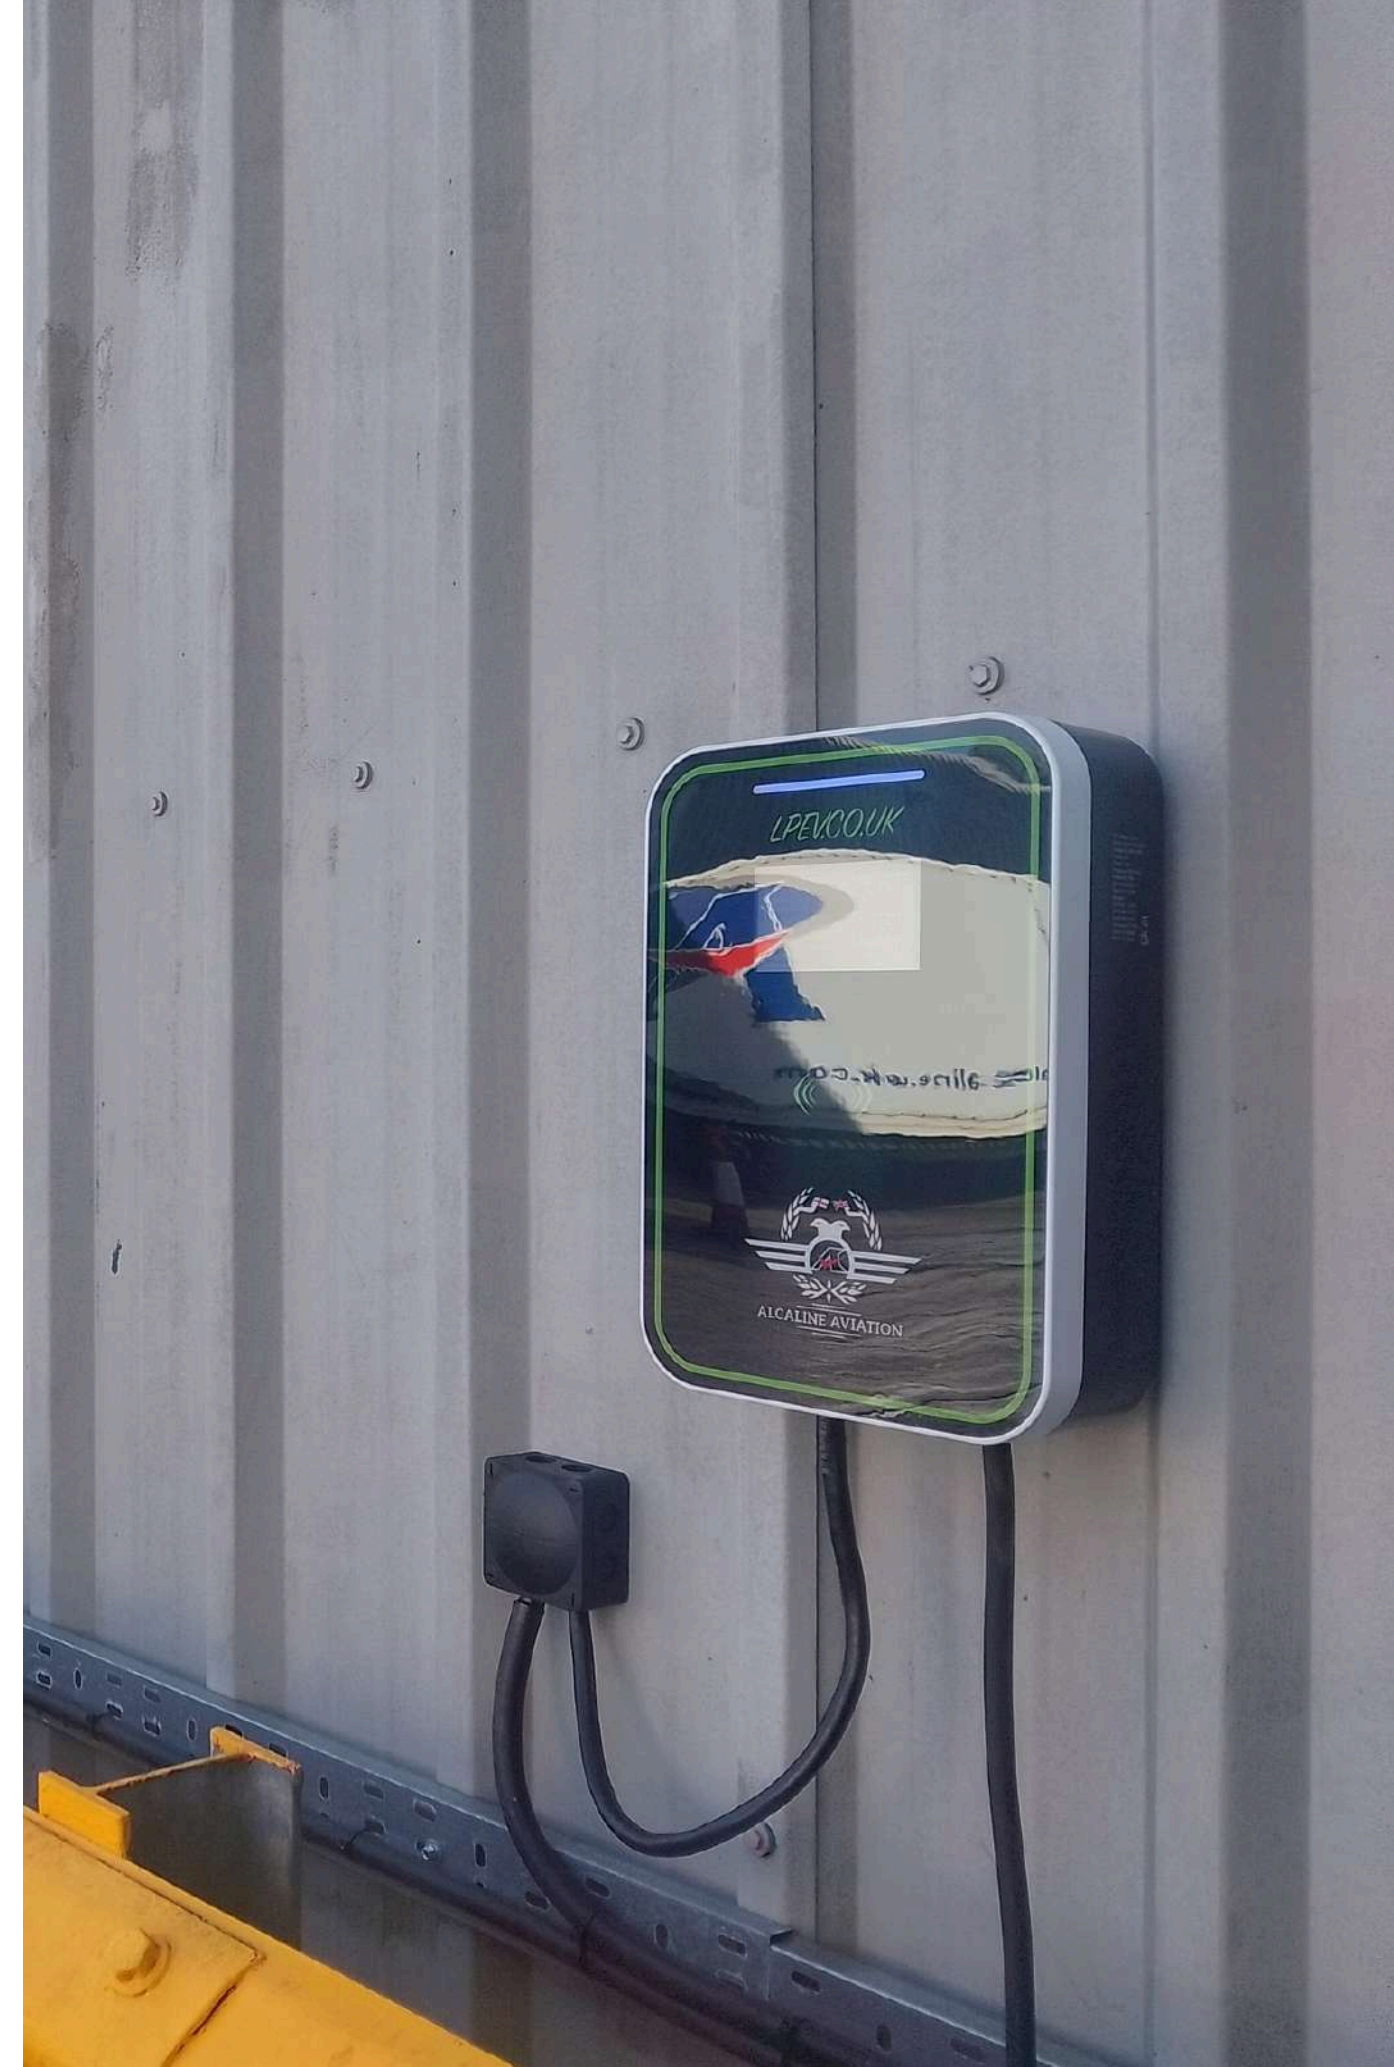

Our accredited engineers ensure minimal disruption to daily operations.

Flexible Hardware Solutions

Our hardware-agnostic approach selects the best technology tailored to your needs.

Dedicated Full-Service Management

We manage your EV project from start to finish, ensuring efficient delivery and optimal results.

WORKPLACE CHARGING

Sustainability Reporting Made Simple

- Transparent reporting with CO2 insights.
- Smart energy management with load balancing and smart charging technology.
- Tailored charging initiatives with customisable tariffs.

Large Estates Solutions

We design charging infrastructure for large estates with seamless integration, scalability, and energy efficiency.

Why LPEV:

Transparent reporting: Track and share your progress in sustainability with comprehensive CO2 insights, hourly utilisation data, and more.

Smart energy management: Maximise energy efficiency across your charge points with load balancing and smart charging technology.

Tailored charging initiatives: Customisable charging tariffs allow you to set different prices for employees, visitors, or the public, with the added opportunity to monetise your network.

Driver support: Depend on our 24/7 support team, ready with help and advice for drivers via phone and email.

PUBLIC EV CHARGING & GENIEPOINT PLATFORM

Finance

Starting your EV journey shouldn't be a financial hurdle. We offer flexible, straightforward financing options including revenue share, making your transition to a sustainable future smooth and financially viable.

GeniePoint Platform

Our exclusive back-office platform offers:

- Proactive monitoring with 24/7 remote diagnostics.
- Data-driven insights for strategic planning.
- Fleet optimisation for hassle-free charge management.
- Monetisation opportunities for public access charging.

Public Charging Solutions

We manage and operate both new and existing public charging networks, ensuring smooth operations and maximised returns.

Why LPEV:

Custom solutions: We design your charging infrastructure to perfectly fit the size and layout of your estate, ensuring seamless integration.

Scalable: Our solutions are built to grow with you, adapting to your estate's evolving needs.

Complexity Simplified: We manage the complexities of multi-site charging and power requirements, providing a simple and hassle-free experience.

Comprehensive Energy Solutions: Beyond charging, LPEV offers on-site energy generation, storage, and management solutions. We optimise your estate's energy use, creating sustainable, cost-effective systems.
