DTF PRINTING *Service*

ONLINE ORDER

Direct-to-Film (DTF) printing is an advanced digital technology for 2026 that delivers vibrant, high-resolution designs with exceptional durability. Unlike traditional methods, DTF involves printing graphics onto a specialized film and heat-transferring them onto the final product, ensuring sharp details and true-to-life colours that withstand frequent use and washing.

PRINTMATIC

INNOVATE • CREATE • PRINT

Printmatic DTF is a specialist printing and embroidery company based in Doncaster, leveraging over 20 years of experience in the garment decoration and promotion industry.

The company provides a comprehensive list of services tailored for businesses, clubs, schools and individual needs, including:

Direct-to-Film (DTF) Printing: A modern technique specializing in high-detail, full-color designs for workwear and apparel that offers high durability and no minimum order requirements.

Embroidery: High-quality stitched branding for a professional finish on items such as uniforms, caps, and outerwear.

General Printing Services: Beyond apparel, they offer general commercial printing solutions, which typically include promotional items, signage, and business stationery.

Known for its technical expertise and industry experience, Printmatic focuses on delivering quality brand identities through a range of customisable products.
